

1 What are adaptations ?	7 What are behavioral adaptations ?
2 What is hibernation ?	8 What is an animal's instinct ?
3 What is camouflage ?	9 What is dormancy ?
4 What is a trait ?	10 What is mimicry ?
5 What is migration ?	11 What is a learned behavior ?
6 What are physical adaptations ?	Adaptations & Life Cycles Flashcards

<p>1 the behaviors and physical characteristics that allow organisms to survive in their habitats</p>	<p>7 when an animals do certain actions to respond to life needs Examples: Migration & Hibernation</p>
<p>2 A period of inactivity where mammals slow their growth</p>	<p>8 A behavioral pattern an organism automatically does (it is born knowing it)</p>
<p>3 To blend in to one's surroundings</p>	<p>9 A period of inactivity where reptiles, amphibians, and plants slow their growth</p>
<p>4 A characteristic</p>	<p>10 To look like another organism</p>
<p>5 A behavioral pattern where an animal goes on a long distance journey from one place to another when the season changes</p>	<p>A behavioral pattern that is taught // by an animal's parents Example: how to ride a bike or catch a fish</p>
<p>6 Traits that deal with an animal's body in order to survive Examples: Mimicry and Camouflage</p>
